GamaSec The Only Real Web Application Security Solution

GamaScan, the next advanced generation of online web application security scan services.

GamaSec service is provided remotely. It requires no installation, no set-up, no hardware purchases, no software development, and no IT security expertise. Customers do not even need special training to use it. Complete online and on demand management consul, phone and email support provided by certified security professionals is included for every customer by the GamaSec R&D department.

GamaSec is the next advanced generation of web application security scanner. GamaScan the most complex web application security services executes continuous dynamic tests combined with simulation web-application attacks during the scanning process.

Web Application Attacks Engine – GamaSec is the only company today that covers more than 20 web vulnerability application families with the capacity to create a tailor made attack. We can adapt to any web site configuration and produce dynamic tests, which will create relevant reports of online scan findings.

Automatic False Positive Prevention Engine GamaSec effectively addresses this issue by creating dynamic false-positive filter rules automatically without any manual interference. The sophisticated GamaSec proprietary hashing system manages and inspects seven dynamically generated pages & includes them internally for automatic rules generation.

Enhanced Report Generation for Scanning Comparison - GamaSec includes an internal report creation engine. With enhanced features it provides the ability to create comparison and trend analysis of your web applications vulnerabilities based on scan results generated over selected time periods. Customers can view their report through the secure GamaSec control panel

GamaSec is unique as an Israeli technology company that has over 10 years of IT security experience and an active in-house R&D Department that published hundred of security advisories worldwide .

75% of cyber attacks are launched on web application! Scan your web site today with GamaScan and find vulnerabilities before hackers do!
